

Item 5 – District Drought Contingency Plan Re-adoption with Revisions

Committee Members

Mark Carrabba – Chair
Bill Harris
David Stratta (absent)

The Education & Conservation Committee meeting was held Wednesday, August 19, 2020 to act upon the following agenda items:

- Annual review of the District Water Conservation and any suggested revisions
- Annual review of the District Drought Contingency Plan and any suggested revisions
- Review current Education budget and prepare a FY 2021 suggested budget for consideration by the Budget/Finance Committee
- Discuss 2020 Conservationist of the Year submissions and prepare a recommendation to the full board

There was one (1) suggested revision to the District Drought Contingency Plan (DDCP) for Board consideration:

- Create a paragraph for the introductory segment stating how the District manages the aquifers independently of each other. This would be the same statement inserted into the DWCP.

It is the recommendation of the Education & Conservation Committee and General Manager that the District Drought Contingency Plan be re-adopted including the revision to the Plan presented by the committee.
