**General Business:**

- Static water level measurements obtained from 142 monitoring during March, 2020

- Purchased a one-year Zoom subscription and began setup and use of the virtual meeting space during the COVID-19 shutdown.
- Mailed all Certificates of Registration to well owners with recently located wells found in the TCEQ archived water well log database.
- Worked at length with John Seifert to identify areally and spatially diverse wells within all eight aquifers for “DFC monitoring well” designation.
- Invoiced all Production monthly permit holders for 2019 water production
- Continued locating wells based of archived well logs housed in the TCEQ database
- Transferred all archived driller’s well logs (850) to the newly created “TCEQ Report” field in the District ArcGIS database for public viewing
- Began reconciling identified wells with proper aquifer using the virtual bore tool going grid by grid through the entire district
- Non-exempt permit holders continue to report monthly water production directly to the ArcGIS database
- ArcGIS map/data program updating of exempt well locations and well data
- Located and logged locations of new completed exempt water wells in both Brazos and Robertson counties
- Continued to expand District presence on social media platforms including Twitter and Facebook
