July 1, 2022

Mr. Gary Westbrook
Groundwater Management Area 12 Coordinator
Post Oak Savannah Groundwater Conservation District
310 East Avenue C
Milano, TX 76556

Dear Mr. Westbrook:

The purpose of this letter is to notify you that the desired future conditions explanatory report and other materials for Groundwater Management Area 12 required by Texas Water Code §36.108(d-3) are administratively complete in accordance with 31 Texas Administrative Code § 356.33.

On February 2, 2022, we received the final packet for desired future conditions adopted by groundwater conservation district representatives in Groundwater Management Area 12. Your submission included: (1) the explanatory reports and the adopted desired future conditions for the relevant aquifers; (2) the postings, minutes, and voting record for the public meeting in which the desired future conditions were adopted; (3) model files; and (4) contact information for the groundwater management area consultant. On April 21, 2022, we requested clarification regarding items required to evaluate the materials for administrative completeness. We received final clarifications regarding these items on June 1, 2022, including a signed resolution adopting the desired future conditions and additional non-relevant aquifer documentation.

We will provide you with modeled available groundwater values for these aquifers no later than 180 days after the date of this letter in accordance with 31 Texas Administrative Code § 356.35. Please contact Jean Perez of our Groundwater staff, at 512-936-4017 or jean.perez@twdb.texas.gov if you have any questions or need any further information.

Respectfully,

Jeff Walker
Executive Administrator
