

RULE 10.3. APPLICATION

An application for a transport permit must be filed in the District office and must include the information and studies required under Rule 8.4 for a drilling and/or operating permit, plus the following information:

- (b) the projected effect of the proposed groundwater transport on aquifer conditions, depletion, subsidence, or effects on existing permit holders or other groundwater users within the District, including the Rule 8.4 information and studies and any proposed plan of the applicant to mitigate adverse hydrogeological impacts of the proposed transport of water from the District.~~the projected effect of the proposed groundwater transport on aquifer conditions, depletion, subsidence, or effects on existing permit holders or other groundwater users within the District, including:
 - (1) a hydrogeological report by a registered professional in hydrogeology assessing the impact of the proposed well on existing wells and the aquifer from which withdrawals are proposed;
 - (2) information describing the projected effect of the proposed transporting of water on aquifer conditions, depletion, subsidence, or effects on existing permit holders or other groundwater users within the District;
 - (3) the names and addresses of the landowners and/or registration/permit holders and the location of their water wells, that are located within the spacing-requirement circumference of the applied for well from which water to be transported to the proposed receiving area is to be produced; and
 - (4) any proposed plan of the applicant to mitigate adverse hydrogeological impacts of the proposed transport of water from the District.~~

The deletions to Rule 10.3 are being proposed to delete redundant language expressed in greater specificity in Rule 8.4 which was amended following the 85th Legislative Session.
