

PROPOSED CORRECTION TO RULE 7.2(d)(3)(G)(v)

Current Language

RULE 7.2(d)(3)(G)(v). ACTIONS BASED ON AQUIFER RESPONSE TO PUMPING

- iv. Reductions to groundwater production will be based on actual production amounts and will be based on the maximum production from a well or aggregate of wells that has been put to beneficial use in any permitted year.
- v. **Singled** permitted wells will be reduced based on the production from the single well. Wells permitted in aggregate will be reduced in aggregate.
- vi. The groundwater production reduction formula may be increased or decreased by the Board, based on the aquifer response to achieve the District's adopted DFCs.

Proposed Correction

RULE 7.2(d)(3)(G)(v). ACTIONS BASED ON AQUIFER RESPONSE TO PUMPING

- iv. Reductions to groundwater production will be based on actual production amounts and will be based on the maximum production from a well or aggregate of wells that has been put to beneficial use in any permitted year.
- v. Singly**ed** permitted wells will be reduced based on the production from the single well. Wells permitted in aggregate will be reduced in aggregate.
- vi. The groundwater production reduction formula may be increased or decreased by the Board, based on the aquifer response to achieve the District's adopted DFCs.
