

Item 8c | DFC Considerations for 4th Planning Round

Members of GMA 12 met Friday, January 23, 2026, to continue discussing DFC values for the 2026 planning round. GMA 12 consultants were instructed to update adopted GAM Run PS4-2 with:

- Pumping from GMA 11
- Pumping from GMA 13
- Pumping from areas within GMA 12 with no groundwater conservation district
- Extend the timeline to 2080

The consultants did not have the “Modified PS4-2 GAM Run” completed and prepared for presentation at the scheduled January 23, 2026, GMA 12 meeting. No consideration by GMA 12 members will begin applying the nine (9) factors until the modification has been completed. It was emphasized to the consultants that the update must be ready prior to the scheduled GMA 12 meeting on February 19, 2026.

GMA 12 continue to express interest in a common database supported by all districts providing water level data and possibly water production data to both GMA members and the public. Halff Associates have issued a project scope of work and cost which will be presented during the February 19th meeting.

Other agenda items proposed for the scheduled February 19, 2026, meeting include:

- Review of Modified PS4-2 GAM Run
- Discussion of region-wide mitigation
- DFCs for the Colorado River Alluvium
- DFCs for the Brazos River Alluvium
- Review of Yegua-Jackson nine (9) factors
