

Item #4 – Determination of Initial Desired Future Conditions

This agenda item is intended to allow:

- Staff to completely update Board members as to the status of the DFC planning process through GMA 12.
- GMA 12 GAM PS4 was made available for public comment which closed April 2nd. All comments received are contained in the “File Browser” under “[8 GMA 12 Public Comments Received](#)”. Please review the comments prior to the board meeting.
- Board discussion and possible action on initial DFC’s for each of the aquifers. Discussions at GMA 12 will soon zero in on levels that are to be agreed upon by the other GMA representatives.
- PS2 was the GMA run from which the BVGCD Board offered to begin discussing the DFC for the Simsboro Aquifer. The DFC value was 365’. PS4 was a second GMA run with the same factors included but with revisions (increases) to the Lost Pines GCD pumping files. This run resulted in a DFC value of 382’.
