

## **Item 5 – GMA 12 DFC Planning Update**

Monique and I will update the Board on progress being made toward determining the 2016 Desired Future Conditions for each of the District aquifers.

- The past meeting held April 30<sup>th</sup> included summations of comments received on the GAM Run Predictive Scenario 4.
- The next meeting will be held May 28<sup>th</sup> at the Milano Civic Center. We will begin to work through the nine items that are required to be considered and included in the written report. Presentations and discussion on two of the nine requirements will begin at this meeting. Those are:
  1. Aquifer uses or conditions within the management area, including conditions that differ substantially from one geographic area to another.
  2. Hydrological conditions, including for each aquifer in the management area the total estimated recoverable storage as provided by the executive administrator, and the average annual recharge, inflows, and discharge.
