

Item #6 – Determination of Initial DFC's

The groundwater conservation districts that comprise GMA 12 (Mid-East Texas, Brazos Valley, Post Oak Savannah, Fayette County, and Lost Pines) all informally agreed to present initial Desired Future Conditions for each of their managed aquifers during the February 4, 2016 regional planning meeting. Following John Seifert's presentation on DFC's, the Board will be asked to propose initial DFC's for each of our managed aquifers for submission to GMA 12.
